## **Toyota Forklift Parts**

Toyota Forklift Part - In the U.S., Toyota Materials Handling inc., or TMHU, continues to be the best selling lift truck dealer since 1992. This business has been headquartered out of Irvine, California for well over 40 years, offering a complete line of quality lift trucks. With an impressive reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the foundation of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S. are manufactured here.

Every one of Toyota's manufacturing facilities within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its commitment to continuous improvement and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, links Toyota's achievement to its strong dedication to constructing the finest quality lift trucks at the same time as delivering the utmost client service and assistance. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's principal lift truck dealer and is among the magazines prestigious World's Most Admired Companies.

## Redefining Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding corporate ideology towards environmental stewardship within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other organizations and unquestionably no other materials handling producer can thus far rival Toyota. Environmental accountability is a key characteristic of corporate decision making at Toyota and they are proud to be the first and only manufacturer to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more elaborate 2010 emission standards. The end product is a lift truck that creates 70 percent less smog forming emissions than the present Federal standards tolerate.

Moreover in 2006, Toyota established a partnership with the Arbor Day Foundation, furthering their commitment to the environment. Greater than 57,000 trees have been planted in community parks and national forests damaged by ecological causes such as fires, as a result of this relationship. 10,500 seedlings have also been spread through Toyota Industrial Equipment's network of sellers to non-profit organizations and neighborhood customers to help sustain communities all over the United States

Toyota's lift trucks offer enhanced strength, visibility, output, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS", helps decrease the risk of mishaps and injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability senses several aspects that might lead to lateral insecurity and potential lateral overturn. When any of those factors are detected, SAS instantaneously engages the Swing Lock Cylinder to stabilize the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to avoid injuries or accidents while adding durability.

The SAS systems were initially utilized on the 7-Series internal combustion lift trucks which were put on the market in 1999. These systems helped push Toyota into the lead for industry safety standards. Now, SAS is used on virtually every new internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with required operator instruction, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there have been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's uncompromising principles extend far beyond the machinery itself. The company believes in offering general Operator Safety Training services to help clients satisfy and exceed OSHA standard 1910.178. Education courses, videos and an assortment of resources, covering a broad scope of topics-from individual safety, to OSHA policies, to surface and load conditions, are available through the dealer network.

Since the transaction of its first lift vehicle in the U.S. to the fabrication of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a solid presence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America today are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and distribution centers for equipment and service parts, with the whole investment exceeding \$113 million dollars.

The contemporary NCC was designed to operate for TMHU buyers and sellers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a instruction center.

The NCC embodies Toyota's dedication to offering top-notch client service. TMHU's 68 sanctioned Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations throughout the U.S, provide the most complete and inclusive consumer service and support in the industry. The company's new and Licensed Used lift trucks, service, components, and financing features make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
